

a-ADAMS SCHOOL OF DRIVING  
Teen (15-17 years old) Information

At a-Adams School of Driving, we are happy to announce two (2) options for driver education. And, of course, both courses include everything without any extra charges.

Included in our **Basic** course are thirty (30) hours of class, six (6) hours of behind-the-wheel instruction and six (6) hours of **mandatory** in-car observation. Included in our **Advantage Plus** program are 30 hours of class & 8 hours of **private** behind-the-wheel instruction. Completion of either course will earn state certification. After the second class session, we will take you for your permit and there is no additional charge for the permit trip. You will then be scheduled for your first behind-the-wheel lesson. These lessons are scheduled to suit the student's convenience and include free pick-up and drop-off at home, school, or work and the instructor's travel time is never deducted from the lesson.

The cost of our course also includes a textbook & workbook, which are yours to keep. There are never any extra charges for registration fees, make-up classes, or payment plan. At the end of the four (4) weeks when you have completed the class, and, as soon as you complete the behind-the-wheel lessons and observation if necessary, we will immediately certify you with the Secretary of State; and will also mail you your Adams certificate, which is used toward high school graduation requirements and your insurance discount.

We also have programs for those teens that need to take only the behind-the-wheel or class.

Because prices vary, and we do run specials, please call today for complete pricing information.
